

Networking and Interprocess Communication:

The below modules provides mechanisms for networking and inter-processes communication.

The list of modules described are:

- 1) asyncio - Asynchronous I/O
- 2) socket - Low-level networking interface
- 3) ssl - TLS/SSL wrapper for socket objects
- 4) select - Waiting for I/O completion
- 5) selectors - High-level I/O multiplexing
- 6) asyncore - Asynchronous socket handler
- 7) asynchat - Set handlers for asynchronous events
- 8) mmap - Memory-mapped file support
